## (2) Configuration of the local storage device

	※ There are three software status types.
<b>Active</b>	Connected to storage or backup device; currently saving the data.
<b>Online</b>	Only connected to storage or backup device.
<b>Offline</b>	Not connected to storage or backup device.

	※ There are three hardware status types.
<b>Healthy</b>	Connected to storage or backup device; functions normally.
<b>Warning</b>	Connected to storage or backup device, but error was detected; in this case, data storing or backup cannot be made (for more information, see the description below).
<b>Fault</b>	Not connected to storage or backup device; cannot perform data saving or backup.

- 
1. **Fault State:** The storage device is completely damaged, and none of the S/W operations can be performed. The fault state is not related to a DVR problem. The DVR has detected the fault and stopped the recording.

2. **Warning State:** The storage device has a physical error that can be corrected by the storage device or by the DVR. If the error is not taken care of, however, the storage device is likely to be damaged (and shift to fault state). Backing up data in the corresponding storage device and replacing the device with a normal one are strongly recommended.

3. If there is an active storage device with a warning or a fault, a message is displayed on the upper left part of the screen.

#### 1-3 1-2 DDNS

As part of the DNS system, the Dynamic Domain Name System (**DDNS**) service updates the IP addresses of host names in real time and allocates fixed domain names to systems linked to dynamic IP addresses to allow users to use the same DNS name regardless of the changes in the IP address. It provides dynamic DNS to ensure URL access in the dynamic IP environment.

User can monitor the remote place thru internet with web server functions which is equipped in DVR.

	<ul style="list-style-type: none"><li>※ Access to DynDDNS sever(<a href="http://www.dyndns.org">http://www.dyndns.org</a>) and apply for the user account then, register the domain name to use and enter URL.</li><li>※ For more information, please access to the sever.</li></ul>
